

Customize button and slide text

⇒ Start this [Guide](#) to learn how to change the text of your buttons and Assistant titles.

Good to know

- Changing the text of the “Next”, “Back”, or “Leave this Guide” buttons will affect all step types (also the intro & outro step)
- You can customize the text of the Assistant titles. The default is “Welcome” as the title and “Get started” as the subtitle.
- If you activated a secondary button in the Customize-Behaviour section, like “Restart” or “Back”, make sure to adjust the default button title here as well.
