

Release Note - Tooltip reposition

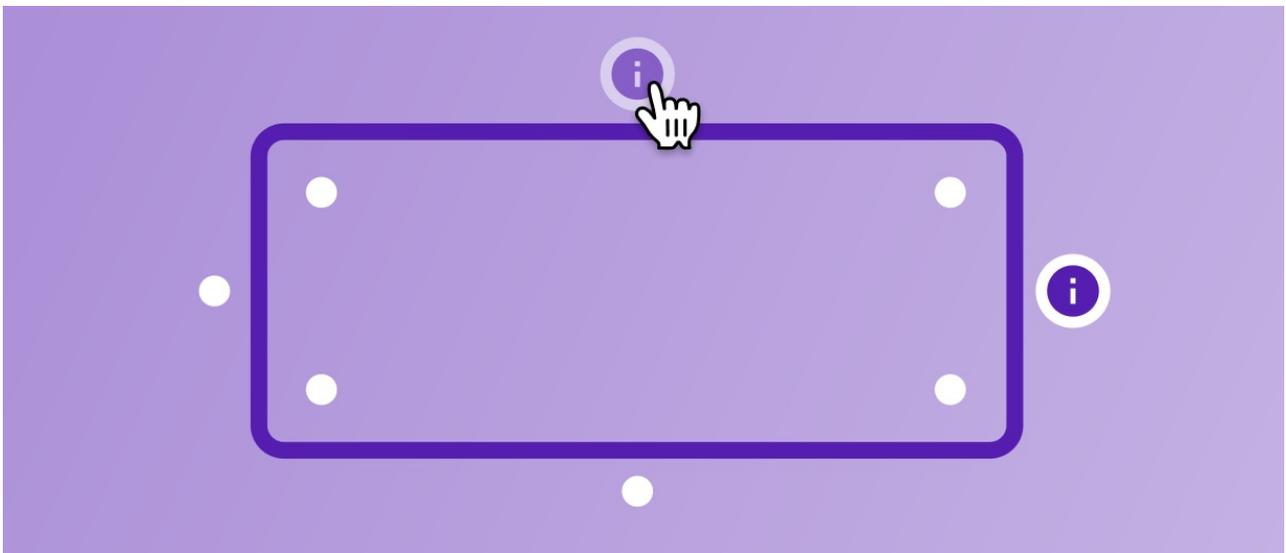

20 June 2022

What's new?

We have listened to your feedback that you would like to choose where your tooltips sit. We have enabled the option to adjust the position of your tooltips and place them in different 8 spots.

Now you can:

- Use the Auto option to let Userlane select the icon position for you, or select Manual to pick the icon position yourself.
- Manually select the icon position from eight positions, including four internal ones.

Try this out now!
