

# Installing and Configuring the Browser Extension for Chrome on Windows (SSO)

Last Modified on 16.01.2024

Microsoft Edge, Mozilla Firefox and Google Chrome allow the silent installation of Browser Extensions. This way, the users do not have to manually install the Browser Extension themselves, but rather the IT Admins can roll out the Browser Extension in the background via a MDM solution, such as Microsoft Intune, Enteo NetInstall, or Matrix42 Empirum.

Each browser needs to be set up separately.

This article explains the configuration for Chrome on Windows.

Browser Extensions in Chrome can be installed and configured through Enterprise Policies. Refer to the official documentation of Chrome at <https://cloud.google.com/docs/chrome-enterprise/policies/> for more info.

## Requirements

- Userlane Customer Success Manager needs to provide companyID and information on region
- IT Admin with access to Browser Installation and Policies
- Userlane Account Admin to set Integrity Token in Userlane Portal

## Steps to Complete the Setup

1. Installation and Configuration
2. Verification

### 1. Installation and Configuration

#### ExtensionInstallForceList browser policy

Add the Userlane Extension (ID for Chrome: oaienfpdbimabhlglbdpocbogaajnam) to the ExtensionInstallForceList: <https://cloud.google.com/docs/chrome-enterprise/policies/?policy=ExtensionInstallForceList> to install the Userlane Extension from the Google Chrome Store.

#### *Example registry file*

Windows Registry Editor Version 5.00

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\ExtensionInstallForcelist]
```

```
"1"="oaienfpdbimabhlglbdpocbogaijnam"
```

You can also download it [here](#).

Note: The Registry Key might need to be modified if multiple Browser Extensions (other than Userlane) are installed to Chrome.

## Browser Policy Configuration

Registry keys in the

```
HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\3rdparty\extensions\oaienfpdbimabhlglbdpocbogaijnam\policy
```

path.

All keys should have type REG\_SZ.

Please note that you need to get the correct **companyId** and **region** from your Customer Success Manager!

**Example registry file:**

```
Windows Registry Editor Version 5.00
[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\3rdparty\extensions\oaienfpdbimabhlglbdpocbogaijnam\policy]
"companyId"="abc"
"companyIntegrity"="xyz"
"region"="eu|us"
```

## 2. Verification

Visit the Userlane Browser Extension Settings

- Do a right click on the Browser Extension
- Choose Options
- Navigate to Managed Storage
- Confirm that all values are present

Example of the information is not set up correctly:

### Managed storage

Policies can be verified on dedicated page: <chrome://policy> (page cannot be linked, please paste url to the address bar)

The managed storage config is empty

If you see this, please go through the installation and configuration steps again.
