

Release Note - Use Pause in all Record Modes

Last Modified on 10.03.2026

15 August 2022

What's new

We are very excited to announce that our pause mode is now available for both record modes and Tooltips. We have introduced a simpler pause mode experience for content creators.

How to use

Now, if you need to pause during the recording of any Guide or Tooltip **press the ALT key (or Option for Mac)**, and the recording will pause. To leave the pause mode, **press again the ALT key (or Option for Mac)** to get back to the record mode.
