

Tooltip Analytics

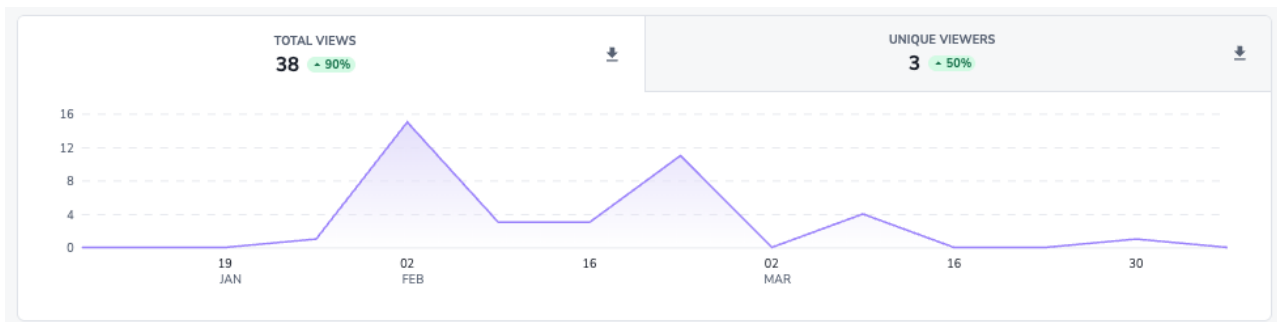

Last Modified on 07.04.2026

Why use it

Use Tooltip Analytics to monitor how well your Tooltips are driving software adoption and supporting your users where they need help. This page allows you to track the interactions with all Tooltips over time, as well as dive deeper to see more granular data for individual Tooltips.

Metrics

Views over time

In the chart above you can see the total views for all of your Tooltips as well as the number of unique viewers plotted over time.

Individual Performance

Below the Views over time chart, you will find a table with all Tooltips.

Tooltips							Search	Download
Status	Type	Name	View rate	Viewers	Visitors	Segments		
Live	Hint	LinkedIn__c text input Tooltip 13 Aug, 12:01	114.3% ▲ 357%	1	6	—		
Live	Hint	'View Calendar' Tooltip w/o icon	105.2% ▲ 14%	47	82	—		
Live	Hint	'Search' Tooltip w icon and linked guide	92.6% ▲ 8%	40	91	—		
Live	Hint	'Today's Events' Tooltip 09 Mar, 13:15	22.4% —	6	17	—		
Live	Hint	'New' link Tooltip 18 Feb, 11:08	14.3% ▼ 50%	2	19	—		
Live	Beacon	'New' link Tooltip 03 Sept, 14:19	4.6% ▼ 34%	4	64	—		
Live	Beacon	'Today's Events' Beacon	3.3% ▼ 25%	5	83	—		
Live	Beacon	'Today's Events' Tooltip 09 Apr, 15:42	3.3% ▼ 20%	5	84	—		
Live	Beacon	Tooltip 26 Jun, 08:09	3.3% ▼ 44%	4	85	—		
Live	Hint	'Sorting by' button Tooltip 18 Nov, 15:37	0% ▼ 100%	0	2	—		
Live	Hint	testing content selector1	0% ▼ 100%	0	1	—		
Used	Hint	'Einstein Recommendations' Tooltip 29 Oct, 10:35	0% —	0	0	—		
Live	Hint	'Open tasks' Tooltip 18 Nov, 15:40	0% —	0	0	—		
Live	Hint	testing content selector2	0% —	0	0	—		
Used	Beacon	'Dashboards' link Tooltip 31 Jul, 14:10	0% —	0	0	—		
Used	Hint	'Tasks' link Tooltip 01 Apr, 17:44	0% —	0	0	—		

Each row corresponds to an individual Tooltip and offers you a helpful overview of that Tooltip's performance.

The horizontal bar chart in the middle of the table represents total values:

- **Visits:** a visit is counted when a user comes to a page and the Tooltip loads
- **Views:** a view is counted when a user has clicked on a Beacon or hovered over a Hint
- **Link clicks:** if a Guide has been linked to Tooltip, a link click is counted when a user clicks on the linked Guide.

The **View Rate** metric corresponds to the total visits and views shown in the bar chart and is calculated as $(\text{Views} / \text{Visits}) * 100$.

i It's possible to have a View Rate greater than 100% for Hints. This is expected because we calculate the View Rate using **Total Views** and a user can view a Hint type Tooltip multiple times in a single visit.

The table also shows you **Unique Viewers** and **Unique Visitors**, which correspond to unique users who have respectively viewed the Tooltip and/or visited the page where the Tooltip is available.

i You can filter the table using the metrics described above. For example, filter by **Most Unique Viewers** to

see which Tooltips are reaching the most individual users.

Tooltip Details

You can click on any individual Tooltip to see how it has performed over time. In this case, you will see a representation of **View Rate** and **Click Rate**, with Click Rate being calculated as **(Total Clicks / Total Views) * 100**.

Below you will find a graphical representation of Total Events and Unique Users, similar to the All Tooltips table on the overview page.
