

Improvements and Fixes - August

Last Modified on 03.09.2025

Improvements

Portal

- Added API authentication token - customers can now use a secret key with each API request for extra security
- Added a filter to show all Guides with errors in the Guides list (Guide Analytics page).
- Introduced daily announcement/survey reminders - useful for urgent updates.
- Apps in the side navigation are now sorted alphabetically, with full names shown on hover.
- Minor UI and design system improvements. For example, improvement on the stacked vertical bar chart in the analytics (added gap between bars).

Assistant

- We made an improvement to how the position of Tooltip icons are calculated such that there is no longer a delay on user scroll.

Fixes

Portal

- We fixed an issue where some AI based functionality in the Portal did not load due to a backend service not restarting properly.
- Fixed incorrect texts in the Announcement builder.
- Fixed a bug where Announcement pins sometimes caused a 409 error.

Editor

- We fixed multiple issues where Tooltips could not be saved after manual changes were made to the code selector for a given Tooltip.

Assistant

- We fixed an issue where the AI Assistant chat was visible in the classic Assistant for Managers after closing the Editor.
-
