Improvements and Fixes - December

Last Modified on 29.01.2026

Improvements

Portal

- We've updated some double-axis analytics charts for better readability and clearer comparisons.
- We've improved Task Trends by implementing new simpler signals on the Tasks page.
- We've refined the donut chart styling with updated strokes and a smaller heading for a cleaner look.

Assistant

- We updated the expiration status for Task sessions.

Fixes

Portal

- We've fixed company user sorting so users are now listed in the correct order.
- We've removed the misleading tooltip for created users to reduce visual noise and keep the UI cleaner.

Editor

- We fixed an issue where the Editor was not sending the correct name to the Portal for Task Actions.

- We fixed an issue where a customer could not create new Chapters in the Editor.

Assistant

- We fixed an issue where the Tooltip icon would detach from the selected element on tables when CSS anchoring was in use.

Other

- We fixed an issue where Userlane caused a certain page on the underlying application to crash.
